## **Your products are under control**

### **LOCKCELL FITBOX** Robotic workpiece loading system

The FITBOX standard machine feeding system is a robotic automation system that reduces labor costs by up to 90% and increases the number of production up to 60%. The simplicity of FITBOX in design is reflected in the ease of use. You can adapt new parts and switch to unmanned work in minutes

Main advantages and uses;

- 1- Multi Table System allows your Operator and Robot to work at the same time. There is no loss in production.
- 2- Fast delivery.
- 3- Multiple machine feeding facility.

## LOCKCELL FITBOX GENERAL FEATURES

- Programmable multi axis industrial robot.
- Fast part removal and installation.
- Product position control system.
- Deburring and measuring processes.
- Double openable drawer system.
- The operator can load while the robot is running.
- High strength roller rail system in heavy loads.
- Compact solution suggestions according to work pieces.
- 7/24 possibility to work without operator error and without stopping the machine.
- Maximum efficiency in minimum space with compact dimensions (500mm x 820mm x 1800mm)
- Simple programming and control system.
- Manual use and adjustment possibility.
