**LOCKCELL<sup>®</sup>plus+**

## **Your products are under control**

### **LOCKCELL PLUS**

LOCKCELL PLUS vertical rotary storage system ensure storage the product that you want to storage in safety and fast and undamaged and it ensure you reach again. The operation of the system is provided by PLC control. Product's storing and taking are provided the transporter that called rack mounted on vertical chain loops.

The racks are reached in the shortest way by turning. This system ensure maximum storage possibility on minimum sole area to you. In this way, you will both work efficiently and save on human trust. Operator health is prioritise through LOCKCELL PLUS's ergonomic design.

LOCKCELL PLUS can be a part of many storage system applications. It works integrated with many storage machines due to LOCKCELL TALAS software. The machine ensures choose possibility to appropriate system according to work and product due to 4 type cap system (manual or automatic one cap, manual or automatic multiple cap).

## LOCKCELL PLUS GENERAL FEATURES

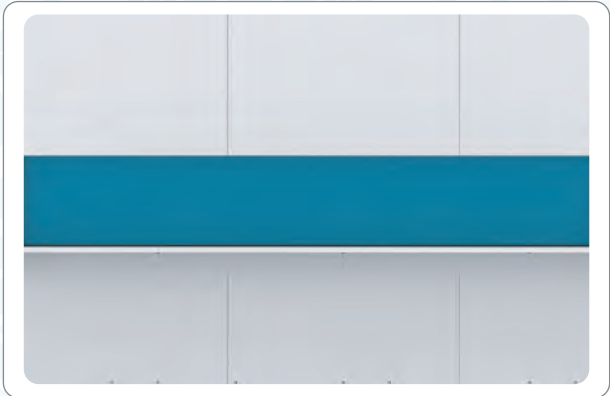

- Area savings of up to 80% over conventional products
- Reduces inefficiencies by up to 70%
- High security through authorization
- İstihdam edilen kaynakların azaltılması.
- Better ratio between occupied volume and storage capacity (in point of weight and volume)
- Zero injury risks and therefore associated costs
- Quick payback period of investment cost
- Clean and sheltered environment.
- The machine ensures choose possibility to appropriate system according to work and product due to 4 type cap system(manuel or automatic one cap, manuel or automatic multiple cap)..
- Lockcell talas software.
- Barcode reader.
- High stock capability with large volume.
- Safe sheet metal structure.
- Oven-daying sheet metal parts.
- User login with password and/or card.
- 21" touchscreen.
- Windows10 Pro operating system.
